WELLHEAD LYSIMETER STATION

MAY 2010

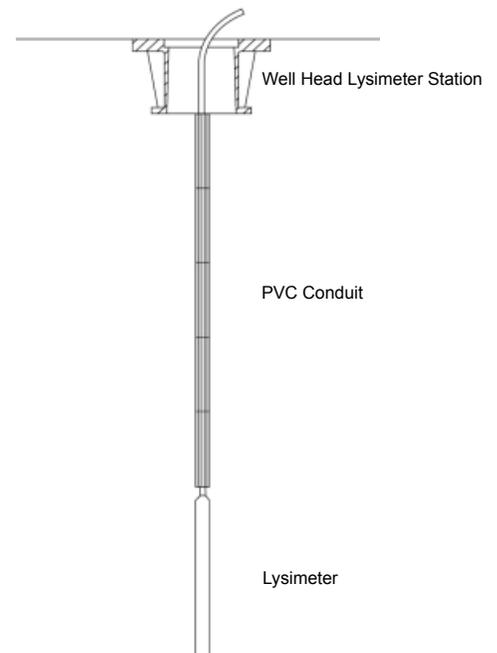

WELLHEAD LYSIMETER STATION Model 1919

Model 1919 lysimeter well head station, to be used with the 1920F1 and 1920F1 / 1922 / 1923 / 1940 models lysimeters can be installed at the surface of your lysimeter location.

The lysimeter well head has a built-in vacuum gauge (0-100 cbar) that will give you information about the vacuum inside your lysimeter. Easy to operate valves, for pressurizing or pulling a vacuum to the system and collecting the sample are in place eliminating the need of elastomer tubing and clamping rings

This very practical well head station is made of strong HDPE has a liquid tight cover and is lockable with a hexagonal bolt. It has a load capacity of max. 350 kgs.

Easy installation and a clean work place for sampling is now available with the 1919 lysimeter well head station.
